What a disappointment. When I turned it on at the lowest setting, it produced a whistle-like sound kind of like an airplane revving up that was entirely unacceptable in an office environment. Because I was very familiar with the OAC100, I believed this particular item was defective. I contacted Amazon, and after followup, received a Return Authorization. I communicated that I knew this was not the way the machine should sound and requested a properly working replacement not a REFUND I had 5 new filters sitting in my office; I didn't want to change to another type of Office Air Cleaner. Long story short, after another considerable amount of time, I received an email to say that technicians had determined the machine was working properly and my purchase price would be refunded less a substantial restocking fee. I'm NOT happy I have 5 brand new OAC100 filters and no functioning machine. If this is how an exceptionally well-functioning machine is manufactured today, it's a sad story. I'm disappointed with both 3M a major manufacturer and Amazon where I've been a frequent customer for more than a decade. Sorry, we failed to record your vote. Please try again. The electrostatically charged fibers are most effective when your filter is new and clean. As particles build up on the filter, they begin to cover up the charged fibers.

The time frame and extent of the reduction will depend upon the actual use conditions in the room in your home. To maximize the air cleaning in the room that contains the air purifier, Filters4Life.com recommend that you clean and seal, the room in which the air purifier operates as much as possible; continue to dust surfaces and vacuum on a normal schedule; and close all windows and doors during operation. With its sleek, sculptured, minitower design, 3M's new small room air cleaner is the perfect nursery and office air purifier. Behind its attractive, modern design is a highly efficient Filtrete filter that grabs and holds allergens and delivers more air circulation for its size than most room air cleaners. The result is cleaner air, because the air in a room passes through the filter more times per hour. All this filtration happens with a minimum amount of noise, in fact the FAP01RS, FAP02RS is the quietest air cleaner of its size on the market today. I found them here and was very happy with their price and ordered them. Was this review helpful to you Shipping is always super fast and quality is excellent. I know when I order they are going to fit perfectly and work better than the original. Was this review helpful to you The filters work great, like the Filtrete filters I put in my central air unit. They're very easy to change. I live in south Louisiana lots of stuff in the air and this filter works great. Glad to find a place to order the filters at a discount. Was this review helpful to you. using a machine learned model instead of a raw data average. The machine learned model takes into account factors including the age of a review, helpfulness votes by customers and whether the reviews are from verified purchases. One morning at breakfast, with the sunlight streaming in through the window I was shocked at how much dust was in the air. Several hours and hundreds of reviews later, it appears that people have problems with all the various brands and models regardless of the price. I choose this one primarily because of the brand name and intended use, office space, figuring hoping this unit would work for a long time. I am very satisfied with my choice. I let it run overnight and there was very little noticeable dust in the morning sunlight. SUCCESS!!!

PROS This is a simple unit. It is basically a fan and a replaceable filter. No fancy computer, one single filter unit, easy to use controls. It has three fan speeds. Low is nonintrusive, medium is noticeable but not obnoxious, my space is small and I don't use the high setting. You can turn the ionizer off or on as desired. And as stated above, it filters the dust. CONS The unit had a strong smell out of the packaging. I left it outside for a few days to outgas. Other notes The unit sucks in through the front and blows the air out of the top. It seems to have a cooling effect on the air which I like. Sorry, we failed to record your vote. Please try again I would not recommend buying this product for these reasons. I have switched to BlueAir machines. Even though they are more costly, I have been more satisfied. Sorry, we failed to record your vote. Please try again Overall it seems to be a good product, does the job, and is very quiet especially on the low setting. The only complaint is the apparent energy usage. I was running the purifier everyday 24 hours without considering the effect. I discussed the matter with the power company, and in comparing all factors, the only difference between this month and previous months including previous summer months is the use of this purifier product. I can't locate the wattage on the product anywhere and will need to check the documentation the power company has a handy calculator for estimating any increases in costs based on the wattage of a product. Sorry, we failed to record your vote. Please try again The design of the unit blends well with commercial office specifications, while providing the purchaser with top of the line Filtrete air purification, silent to quiet running modes, and a touch button display on a compact unit. This is a good entry level unit for smaller offices that will fit right in at a commercial office space. Sorry, we failed to record your vote. Please try again.

With the feral state into which an office atmosphere can so easily fall at heart, 3M has devised the very thing for it the OAC office air cleaner series. The OAC100 can work an office space of up to 22 x 24 cubic feet with an average of two smelly feet per desk, completing one air exchange per hour. Using a state of the art ioniser, the OAC100 is an industrious little tyke with relatively low power consumption, and it produces no ozone. The replaceable filters also have a trick or three under their sleeve. Empowered by 3M's microparticle filtration technology, Filtrete filters contain none of the fibreglass that can shed into the very air it must clean, and they are designed to repel fungal types from taking up residence.
